Explanations	

Our company, in a joint venture consisting of Kontrolmatik Teknoloji Enerji ve Mühendislik A.Ş. and Asos Proses Makina Sanayi ve Ticaret A.Ş., has participated in the tender issued by Eti Maden İşletmeleri Genel Müdürlüğü for the "Kırka Lithium Carbonate Production Facility Construction Work" and has been ranked first by submitting the most favorable bid in the amount of 3,295,000,000.00 TRY (Turkish Lira) as a result of the evaluation.

This project holds the distinction of being Turkey's first lithium carbonate production facility and carries strategic importance for the energy storage systems and advanced technology sectors. With an annual production capacity of 600 tons of lithium carbonate, the facility will enable the processing of lithium from domestic resources, thereby reducing the country's dependence on imports and contributing significantly to the energy transition.

Should our proposal be deemed appropriate by the administration, the contracting process will commence. Further developments will be shared with the public.

Respectfully announced to the public.

Turkish and English translations of this statement are available, and in case of any conflict between them, the Turkish version will prevail.
