Explanations	

As part of the technology transfer and licensing agreement signed between our company and Chint Electric Co. Ltd., the type testing processes of the first prototype of the 245 kV Gas-Insulated Switchgear (GIS), developed through R&D and engineering investments, have been successfully completed as of today in various internationally accredited laboratories .

The construction and infrastructure works of our production facility established in Polatlı, Ankara have been completed, and preparations for manufacturing have begun for our first order — the 154 kV Osmaniye GIS project. Following the completion of the construction, mass production is planned to commence within 2025.

Turkish and English translations of this statement are available, and in case of any conflict between the Turkish and English versions of this statement, the Turkish version will prevail.

We respectfully present this information to the public.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
